

SULIVA SAGABAEN BANGUG

Grade 11 - Perseverance

ADVOCATING FOR A POLLUTION-FREE ENVIRONMENT

ENCOURAGE REDUCE, REUSE, RECYCLE OF PRODUCTS

As a student, I will promote the advantages and benefits of the 3R's - Reduce, Reuse, and Recycle. It would be better if we start early or young that we impart in ourselves this act for our environment.

RECOMMEND ACCESSIBLE GARBAGE BINS FOR PROPER DISPOSAL AND SEGREGATION

At times, students tend to be confused with the proper waste disposal, and oftentimes there is only one trash bin within the area making students throw all kinds of waste there, may it be biodegradable or non-biodegradable.

Therefore, if there are accessible and segregated garbage bins, students can now dispose of their wastes accordingly.

WORK WITH THE SCHOOL FOR PLASTIC-FREE DAYS

Each day, students tend to bring or buy items that contain plastic such as food packaging, and as we know, plastics remain in our surroundings for a long time that can harm and pose damage to our environment. By allotting specific days in a week in promoting "Plastic-Free Days", I believe this can help in reducing the plastics in our environment.
